

Fun Fact

Memories that are linked with a specific smell carry more emotion than visual memories. The nerve signals that share sights, sounds and touch typically go through the thalamus. Smell signals bypass this area and go to the olfactory bulb and then to the amygdala and hippocampus, which deal with higher-level thinking.

The Garden Bug

The bird-of-paradise plant can be toxic to animals, so keep pet access in mind if you choose one. These plants are known to live for more than 50 years with the right growing conditions, not even flowering until they are five or six years old. They can do well in pots indoors, but they grow tall, upward of five feet in some cases, and their leaves love to spread out, so be sure your potted bird-of-paradise has plenty of room.
